Veterinary Report

Horse: *Mrs America _ Playing God_24_Colt*
Signalment: Brown/Bay Colt
Brands: RMO 2/4
Microchip: 985100012244416
Examined at: Dion Luciani Racing stables Ascot

At the request of Simon Miller Racing the above-named horse underwent veterinary examination at Dion Luciani Racing stables, Ascot, on the 2/9/2026. The purpose of the examination was to provide a veterinary certificate for inclusion in the product disclosure statement (PDS) for syndication by BlueBlood Thoroughbreds.

Clinical Examination:

The clinical examination included thoracic and abdominal auscultation, ophthalmic examination, oral examination and musculoskeletal palpation and examination at the trot. No abnormalities were detected on clinical examination of the horse. No lameness was detected on trot out examination. No joint effusion, tendon/ligament heat pain or swelling were appreciated on palpation of the limbs. No resentment or lameness were induced on flexion testing of the limbs. The horse has two descended testicles. There was no evidence of previous abdominal surgery, infection or disease, lameness, laminitis or neurologic deficits.

In my opinion, at this time, the *Mrs America_Playing God _24 Colt,* presented as suitable for purchase as a racehorse as can be determined from the examination performed as described. *Mrs America_Playing God _24 Colt* is suitable for public syndication.

I confirm that I do not have any current or intended future financial or other interest in the above-named horse, the proposed syndication or BlueBlood Thoroughbreds, other than to supply veterinary opinion of the suitability for racing. This certificate may be relied upon by potential investors, however it does not constitute a “pre-purchase” examination.
